MySCCC homepage click onto “Wireless Access Network Registration”.

You must accept the terms of the Wireless Access Network Registration to register a device.

Screen displays all request activity that is Active or Pending for you.

If less than two Active or New requests exist, you may add a device. You may also edit any of their devices that are New or Active.

*(Should you require more than 2 devices, contact Networking and Telecommunication Department)*
By adding/updating the device, an e-mail will be sent to the Networking and Telecommunication Department, to notify them of your request.

*(due to the backlog of wireless devices please allow 3-5 working days)*

An e-mail will be sent to you when the device has been registered.
