COURSE OUTLINE

Instructor: Joseph L. Cerbone
Course: Landscape Design I
Catalog #: HO55
Section #: 6597
Semester: Fall 2004
Office Hours: By Appointment (Day/Evening 516-807-1587)

OBJECTIVES

1. Explain the principles of landscape design.
2. Apply the principles of design to the landscape setting.
3. Set up paper on the drawing table and properly use the necessary drawing tools.
4. Be able to work from a survey plan and develop a site plan for a residence.
5. Properly arrange plant materials in planting designs.
6. Select and include in a landscape plan the appropriate construction materials.
7. Apply all of the above objectives and develop a completed landscape design for a residential property.
8. Be able to present and explain a completed design to a prospective customer.
9. Develop a product notebook on landscape design services and materials.
10. Develop a presentation of a finished design for a selected group of viewers.

EVALUATION

1. Exams (1) --------------------------------- 15%
2. Designs --------------------------------- 45%
3. Final Design --------------------------------- 25%
4. Budget/Presentation --------------------------------- 10%
5. Product Notebook/Symbol --------------------------------- 5%

SUPPLIES

T-square 30/60 45/90 Triangles
Scales - Architect/Engineer Pencils, (Pens – optional)
Drafting Paper Circle Template
Protractor Compass
Erasers - Kneaded Drafting or Masking Tape

Each class session will have time designated for designing. Be sure to have your drawing materials with you.

Attendance each session is obviously necessary to accomplish the work that will be assigned. More than four hours (one class) of unexcused absence will be cause to withdraw the student from the class.

If time permits, a field trip will be scheduled.
