

Suffolk County Community College

College Brief

NO. 42 November 30, 2012

TO: The College Community

FROM: James E. Sherwood, Ph.D. – Executive Dean

SUBJECT: Annex Building Parking Lot Changes at the Ammerman Campus

Construction associated with the new Science and Technology Building on the Ammerman Campus in Selden will impact upon Parking Lot 1, which is adjacent to the Annex Building. Effective immediately and lasting throughout the construction period, which is anticipated to last approximately 18 months, the northern part of the Annex lot is closed to student and staff parking. This section of the parking lot will be used as the construction site staging area for the new building.

To help you visualize the area of impact, the aerial map below illustrates the Annex parking lot. The closed section of the lot will be fenced-off during the construction. A new walkway has been put in place that borders the north side of the closed parking area and connects to the existing walkway that provides access to the more southern portions of the campus.

Students & Staff access from Annex parking lot.
