Integrating Computer-Based Technology in Your Classroom

Multiple tech resources are currently being used in the classroom, greatly enhancing both the teaching and learning environment. For example, in the sciences, these tools are being used to meet general education competencies such as information technology competency, scientific reasoning, critical thinking skills, and problem solving.

Dr. Keith Baessler, professor of chemistry, will provide you with an overview of a variety of tech-teaching tools and learning instruments. How general education competencies are met and assessed will be described. Some of the tech resources that will be discussed are tablets, video chat software, online survey creators, cloud storage, PowerPoint voice record, Camtasia, YouTube, Visio, discussion boards, and lab simulations.

Wednesday, April 29, 2015
11:00 a.m. — 12:15 p.m.
Sagtikos 141 classroom 3
